github.com/harshaalla — Personal Portfolio

PROFESSIONAL SUMMARY

Detail-oriented Software Engineering student with a focus on Full-Stack Development and Cyber Security. Proven track record of building scalable web platforms and security tools using the MERN stack, Python, and C++. Skilled in developing RESTful APIs and optimizing frontend performance for enhanced user engagement.

EDUCATION

Aditya University <i>Bachelor of Technology in Information Technology; CGPA: 8.63/10.00</i> Key Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Java.	Kakinada, AP Jan 2023 — Apr 2027
Narayana Junior College <i>Intermediate (MPC); Score: 90.5%</i>	Vijayawada, AP Jun 2021 — May 2023

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript (ES6+), SQL, HTML/CSS
Frameworks/Tools: React, Node.js, MongoDB, Flask, REST APIs, Git, Linux, Figma, OpenCV

PROFESSIONAL EXPERIENCE

Full Stack Developer With React Native — Technical Hub - Aditya University	May 2025 — Present
• Developed and launched SkillHance, a career guidance platform utilized by 500+ engineering students to access curated learning roadmaps. • Optimized frontend performance by 30% through efficient state management in React, leading to a smoother user experience and reduced bounce rates. • Collaborated in an Agile environment with 5+ peers to integrate quiz modules, increasing daily active user engagement by 15%.	
Cyber Security Intern — Supraja Technologies	May 2025 — Jun 2025
• Engineered a Python-based desktop Application using Tkinter and OpenCV, automating security surveillance tasks for internal testing. • Implemented secure automated reporting via SMTP/SSL, reducing manual notification time by 40%. • Conducted vulnerability assessments using Burp Suite and Wireshark, identifying and documenting 3 critical network flaws during training simulations.	

KEY PROJECTS

Credit Risk System — <i>Flutter, Node.js, Python</i>	Link
• Architected an end-to-end pipeline that processes borrower data to predict loan default risk with a high degree of accuracy. • Developed a scalable REST API that handles real-time credit score computations, reducing processing overhead by 20%.	
Find Job Platform — <i>React, Node.js, MongoDB</i>	Link
• Built a full-stack job portal featuring secure JWT authentication and a robust search algorithm to filter jobs by domain. • Designed a responsive UI that improved mobile user navigation scores by 25% based on initial beta testing feedback.	
Placify - Career Agent — <i>JavaScript, REST APIs</i>	Link
• Integrated real-time API services to automate the delivery of personalized interview prep materials to students. • Streamlined placement tracking, centralizing data for over 10+ professional development courses.
